

**It took years to make it a farm...
It takes one call to keep it safe.**

The soil on your farm or ranch is rich with nutrients and minerals...
AND underground gas, oil and water pipelines.

Excavations, terracing projects, fence post installation, tiling or
subsoiling can create safety hazards due to the depth of the excavations.

CALL BEFORE YOU DIG in order to notify utility companies who will
be affected by the excavation.

No one digs more dirt than America's farmers and ranchers.
Understanding what is below ground will help you DIG SAFELY
above ground. CALL BEFORE YOU DIG!
