Complex Project Ticket Creation

Complex Project tickets are required when excavation involves more work than can properly be described in a single locate request which is 1,000 feet or intersection to intersection, whichever is greater, along the same street within the same political subdivision.

Additional data will be collected on Complex Project tickets. In order to capture more information to describe the work area when entering a Complex Project ticket through Coordinate PA you can now choose a Work Location Type of "Bounding Streets" or "Starting and Ending Points."

Bounding Streets will display four street fields to enter the names of the streets surrounding the work area.

Work Location Type

Bounding Streets	⌄

Street 1*

Street 2*

Street 3*

Street 4

☐ Marked in White?

☐ In a Subdivision

Other Location Information

Example:

Bounded By: IRWIN RUN RD
      And: NOBLE DR
      And: LUTZ LN
      And: BUTTERMILK HOLLOW RD

Starting and Ending Points will display the Site Street as well as a Starting Intersection and an Ending Intersection.

Work Location Type

Starting and Ending Points	⌄

Site Street*

Starting Intersection*

Ending Intersection*

Example:

Site Street: IRWIN RUN RD
  Between: NOBLE DR
     And: LUTZ LN

Additional fields were added to Complex Project Tickets such as: Duration, Site Marked in White, Subdivision, Depth, Extent, Method, Equipment Type, and Working in or on (Street, Sidewalk, Public, Private).
