SERIAL NUMBER FORMAT

The Serial Number format shown on Pennsylvania One Call System tickets follows:

[YYYYJJ]1234]

- **YYYY** represents the four digit year
- **JJJ** is the Julian calendar date in that year
- **1234** represents the incremental sequence for this specific ticket created on that year and day

Example: 20212011023

- Year is 2021
- Julian Date 201 is July 20 in the year 2021
- Sequence number for the ticket is 1023

The Serial Number includes a version:

Example: 20212011023-001

-000 is used for a New Serial Number and includes

- the first call on a locate request
- an update to an existing locate request (assigned a new Serial Number and changes the Scheduled Excavation Date)

-001 or higher

- Renotify - reissues the locate request to one or multiple receiving site facility owners requested by the excavator to advise of a locate issue (not marked, incorrectly marked or other)
- Cancel a locate request

MESSAGE TYPE FORMATS

The Message Type format is shown on Pennsylvania One Call System tickets as follows:

[ACTION TYPE][REQUEST TYPE][REQUEST CLASS]

Example: [NEW][EXCAVATION][ROUTINE]

MESSAGE TYPE LABELS

The following labels identify the types and classes of calls handled.

ACTION TYPE – how the ticket was created

NEW	-- a new work location request
UPDATE	-- to update the Lawful Start Dates on an existing ticket; no other information will change
RENOTIFY	-- a follow up by the excavator requesting a response about an existing ticket
CANCEL	-- notification by the excavator that the work will not be done
ANNOUNCEMENT	-- complex project information is Posted, Modified, or Closed

REQUEST TYPE – the kind of work being performed

EXCAVATION	-- the movement of earth, rock, or other material
DAMAGE	-- damaged or exposed underground facility or facilities
ODOR OF GAS	-- reports non-excavation odor of gas to gas or pipeline facility owners
DEMOLITION	-- partial / complete destruction of a structure served by / adjacent to underground lines
NO ONE CALL	-- reports excavation work where reason to believe no existing One Call ticket exists
CROSS BORE	-- reports cleaning clogged sewer drains to avoid potential damage to utility lines

REQUEST CLASS – the timeframe of the ticket

EMERGENCY	-- work declared Emergency as defined by Act 287 by the excavator
DESIGN	-- facility information is needed to prepare plans / drawings for future excavation work
ROUTINE	-- not less than three nor more than ten business days in advance of excavation work
INSUFFICIENT	-- less than three business days notice in advance of excavation work
COMPLEX PROJECT	-- for large projects or multiple worksites, and/or to schedule pre-construction meetings

SPECIAL INSTRUCTIONS FOR FINAL DESIGN:

This format is good for FINAL DESIGN tickets.

FINAL DESIGN tickets are for excavation or demolition design work not more than ninety business days before final design will be completed.

The *Scheduled Excavation Date* field transmit with the word "DESIGN" in the value.

Otherwise, the field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* is collected from the caller, the output will display the brackets only:

Location Information--
[]

The following labels and values will always be suppressed on a Design ticket:

- *Site Marked in White*
- *Dig Time*
- *Duration*

The following labels and values will be suppressed when empty:

- *Ward*
- *At Intersection*

SPECIAL INSTRUCTIONS FOR PRELIMINARY DESIGN:

This format is good for PRELIMINARY DESIGN tickets.

PRELIMINARY DESIGN requests may be made for excavation or demolition work more than ninety business days before the final design will be completed.

The *Scheduled Excavation Date* field transmit with the word "DESIGN" in the value.

Otherwise, the field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* is collected from the caller, the output will display the brackets only:

Location Information--
 []

The following labels and values will always be suppressed on a Design ticket:

- *Site Marked in White*
- *Dig Time*
- *Duration*

The following labels and values will be suppressed when empty:

- *Ward*
- *At Intersection*
- *Between Intersections*
- *Attachments*

SPECIAL INSTRUCTIONS FOR DEMOLITION ROUTINE:

This format is good for DEMOLITION tickets.

DEMOLITION means the work involves the partial or complete destruction of a structure, by any means, served by or adjacent to a line or lines.

On DEMOLITION tickets, the *Type of Work* value will begin with the word "DEMOLITION" followed by a space and free form detail provided by the excavator.

Because disconnect of lines attached to a structure being demolished must be secured directly with the utility, the excavator is asked if they contacted utilities. If a direct call to the utilities was made, *Remarks* will display: "CALLER HAS CONTACTED UTILITIES DIRECTLY FOR DISCONNECTS/METER REMOVAL." If a direct call to the utilities was not made, *Remarks* will display: "CALLER HAS BEEN ADVISED TO TELL PROPERTY OWNER TO CONTACT UTILITIES DIRECTLY FOR DISCONNECTS/METER REMOVAL."

The field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* is collected from the caller, the output will only display the brackets:

Location Information--
 []

The following labels and values will be suppressed when empty:

- *Ward*
- *At Intersection*

SPECIAL INSTRUCTIONS FOR INSUFFICIENT:

This format is good for INSUFFICIENT tickets.

INSUFFICIENT tickets indicate the caller is stating they will begin their NON-Emergency Excavation before the minimum three business days' notice required in Act 287.

Note: RENOTIFY action types made for Routine tickets almost always transmit as an INSUFFICIENT request class because the *Scheduled Excavation Date* is less than three business days when the excavator calls for the Renotify due to a locate issue or complaint.

The field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* is collected from the caller, the output will only display the brackets:

Location Information--

SPECIAL INSTRUCTIONS FOR EMERGENCY:

This format is good for EMERGENCY tickets.

EMERGENCY tickets indicate the excavator has acknowledged their work complies with the definition of Emergency in Act 287. The excavator determines the Scheduled Excavation Date and Time on an Emergency. The Scheduled Excavation Date and Time on an Emergency is not determined by the system or the Customer Service Representative.

SPECIAL INSTRUCTIONS FOR DAMAGE:

This format is good for Damage tickets.

DAMAGE means a hit or an exposure (near-miss) of one or more underground facility owner(s) lines has occurred. DAMAGE notifications transmit at an Emergency priority with the Scheduled Excavation Date and Dig Time as the current date and time.

The ticket is qualified as either a hit or exposure, reflected at the beginning of the *Type of Work* value as "DAMAGE" or "EXPOSED." The word is followed by facility type detail as provided by the excavator.

Both the "from" and the "to" *Lawful Start Dates* will transmit with spaces [] instead of the [DD-MON-YY] format.

The following data are collected specifically for DAMAGE tickets and appended into *Remarks*:

- "FACILITY TYPE: <displays a blank, or up to two facility types with a comma separator>"
- "HAZARDOUS RELEASE: <YES> or <NO>" (one of these options)

Otherwise, the field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* is collected from the caller, the output will only display the brackets:

Location Information--
[]

The following labels and values will always be suppressed:

- *Called for Contractor*
- *Duration*

The following labels and values will be suppressed when empty:

- *Ward*
- *At Intersection*
- *Between Intersections*
- *Attachments*
- *Private*
 - *Front*
 - *Rear*
 - *Left*

SPECIAL INSTRUCTIONS FOR ODOR OF GAS:

This format is good for ODOR OF GAS tickets.

ODOR OF GAS tickets transmit exclusively to gas and pipeline facility owners when the caller states they detect an odor of gas outside of a structure. ODOR OF GAS notifications transmit at an Emergency priority with the Scheduled Excavation Date and Dig Time as the current date and time.

The *Type of Work* value will always display "ODOR OF GAS"

The caller is asked if they know the gas or pipeline company name, which is appended to *Remarks* as follows: "GAS COMPANY: <name>"

Both the "from" and the "to" *Lawful Start Dates* will transmit with spaces [] instead of the [DD-MON-YY] format.

The *Lawful Start Date* fields will be transmitted with blanks (no value) on the output. Otherwise, the field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* is collected from the caller, the output will only display the brackets:

Location Information--
[]

The following labels are values are always suppressed on Odor of Gas tickets:

- *Site Marked in White*
- *Depth*
- *Extent of Excavation*
- *Method of Excavation*
- *Equip Type*
- *Called for Contractor*
- *Job Number*

SPECIAL INSTRUCTIONS FOR UPDATE:

This format is good for UPDATE tickets.

An UPDATE ticket indicates work on the original, existing ticket is in progress, stopped and is starting again, or has not yet started. An UPDATE ticket assigns a new *Serial Number* and references the original *Serial Number*, resets the *Lawful Start Dates* to be the legal notice, and sets the *Scheduled Excavation Date* for three business days from the day submitted.

This example is for a ticket originally a *Routine*. If the original ticket was another message type, the format will observe the rules and suppressions for that type.

The display of *Lawful Start Dates* and *Scheduled Excavation Date* are the same as for the ticket type being updated. For example, an Update of a Preliminary Design ticket will follow the Preliminary Design rules for the label for the *Project Dates* and the word "DESIGN" in the *Scheduled Excavation Date*.

The UPDATE action is available for DEMOLITION AND EXCAVATION Request Type and ROUTINE Request Class tickets only. CANCEL tickets are not eligible for UPDATE.

An UPDATE banner is added in the *Remarks* and displays the serial number being updated. The banner will also have a time stamp that includes the CSR login initials, date and time, and the tape channel number or web ticket entry user login if the ticket originated via Web Ticket Entry.

Sample Banner 1:

*****== UPDATE 20191021281-000 --4/12/2019 1015 ACE WEB==***** (Banner)

UPDATE REQUESTED BY: ALLEN EDWARDS (UPDATE requestor)

REASON FOR UPDATE: WORK NOT STARTED (UPDATE reason)

REMARK LINES. (Indicates excavator needs to have facility lines marked again)

Sample Banner 2:

*****== UPDATE 20191021282-000 --4/12/2019 1133 HJP 34==***** (Banner)

UPDATE REQUESTED BY: GREG ISELE (UPDATE requestor)

REASON FOR UPDATE: WORK IN PROGRESS (UPDATE reason)

REMARK LINES. (Indicates excavator needs to have facility lines marked again)

Sample Banner 3:

*****== UPDATE 20191021283-000 --4/12/2019 1212 RBW 20==***** (Banner)

UPDATE REQUESTED BY: DEBBIE DAVIS (UPDATE requestor)

REASON FOR UPDATE: WORK STOPPED STARTING AGAIN (UPDATE reason)

NO ADDITIONAL MARK OUTS NEEDED. (Excavator does not need lines marked again)

Sample Banner 4 (Only for Complex Project Tickets):

*****== UPDATE 20191021285-000 --4/12/2019 1308 HJG 25==***** (Banner)

UPDATE REQUESTED BY: DEAN THOMAS (UPDATE requestor)

REASON FOR UPDATE: MEETING DETAILS CHANGED (UPDATE reason)

NO ADDITIONAL MARK OUTS NEEDED. (Excavator does not need lines marked again)

SPECIAL INSTRUCTIONS FOR RENOTIFY:

This format is good for RENOTIFY tickets.

A RENOTIFY is a re-transmit of an existing ticket to advise one or more facility owners of locate-related issues. The *Serial Number* is not changed, however, the *Version* will increment with each successive RENOTIFY.

This example is for a ticket originally a *Routine*. If the original ticket was another message type, the format will observe the rules and suppressions for that type.

RENOTIFY will almost always transmit as an INSUFFICIENT request class because the *Scheduled Excavation Date* is less than three business days at the time the excavator calls due to a locate issue or complaint. If the original was another message type, the format rules will adhere to that type.

The original *Lawful Start Dates*, *Scheduled Excavation Date* and *Dig Time* do not change, and remain the same as recorded in the 000 version of the ticket.

CANCEL and MEETING tickets are not eligible for RENOTIFY.

Sample of Renotify fields:

===== Copyright (c) YYYY by Pennsylvania One Call System, Inc. =====
[Originally sent as sequence number NNNNN at MM/DD/YY HHMM]

[Ticket (re)sent at your request]

SPECIAL INSTRUCTIONS FOR RESEND:

A RESEND is a manual re-queue of a previously successful logged delivery.

This format is good for RESEND tickets.

This example is for a ticket originally a Routine; if the original was another message type, the format will observe the rules and suppressions for that type. RESENDS may be done for all ticket types.

A RESEND does not change any data, with the exception of the delivery header, which is populated with a new delivery sequence number and the date and time of the Resend. Additionally, the header will end with the letters *RSND* to the right of the tickets type codes.

A RESEND may also be manually forced to a facility owner not on the original notification list when the Excavator has cause to believe non-notified facilities are present at the site and are requesting a locate / response.

A RESEND conditionally adds one of two text lines at the end of the transmission.

RESEND text lines:

1. "[Originally sent as sequence number NNNNN at MM/DD/YY HHMM]"
 When the CDC was in the member list of the Resent ticket.
 The original SEQUENCE number and date of the previous delivery of the ticket for the Member receiving site is referenced.
2. "[Ticket (re)sent at your request]"
 When a ticket is forced to a member not in the original member list.

SPECIAL INSTRUCTIONS FOR COMPLEX PROJECT:

These are good formats for COMPLEX PROJECT.

Act 50 states "**COMPLEX PROJECT means an excavation that involves more work than properly can be described in a single locate request* or any project designated as such by the excavator or facility owner as a consequence of its complexity or its potential to cause significant disruption to lines or facilities and the public, including excavations that require scheduling locates over an extended time frame.**"

COMPLEX PROJECT TICKETS are required.

The Scope of Work specifies information for the expanded area involved on large projects. Three street names are required.

- One or multiple municipalities may be included (maximum seven connected municipalities).

The following fields are added:

- A field at the end of the Message Type line for Complex Project Request Class [COMPLEX PROJECT] [X]
If the X value is "L" – the Scope of Work will format streets with the labels:
 - **Site Street** (for <Street 1>)
 - **between** (for <Street 2>)
 - **and** (for <Street 3>)
 If the X value is "B" – the Scope of Work will format streets with the labels:
 - **Bounded by** (for <Street 1>)
 - **and** (for <Street 2>)
 - **and** (for <Street 3>)
 - **and** (for <Street 4>)
- Site Marked in White
- Subdivision
- Mapped Type, Mapped Lat/Lon
- Depth, Extent of Excavation, Method of Excavation
- Duration
- Equip Type
- Called for Contractor
- Working in or on
 - Street
 - Sidewalk
 - Public
 - Private
 - Other
 - If Private is true
 - o Front
 - o Rear
 - o Left
 - o Right

The following labels and values will be suppressed when empty:

- Reason for No Meeting
- Meeting Location
- Ward
- Caller Ext
- Email
- Bounded by Street 4
- Called for Contractor
- Contact Ext
- Onsite Contact Email
- Job Number
- PennDOT Contract/Permit Number
- Caller Lat/Lon
- CPA Project ID
- CPA Phase ID
- CPA Location ID
- Geometry (suppressed by default unless a receiving site CDC "Opts-In" to receive this Open Geospatial Consortium Well Known Text value for parsing)

The following ticket format fields are not applicable to Complex Project Tickets:

- At Intersection
- Between Intersections
- Scheduled Excavation Date
- Dig Time
- Complex Project Number

COMPLEX PROJECT tickets are created and viewed by logging into the Pennsylvania One Call System Web Site at www.paonecall.org with an authenticated account and a link to the Coordinate PA application. Projects are visible to the project creator's company, agent, project contacts, and all affected facility owners when private. Public projects are visible for coordinating opportunities to all Coordinate PA facility owner member users.

*** SINGLE LOCATE REQUEST SCOPE OF WORK:** 1000 FEET OR INTERSECTION TO INTERSECTION, WHICHEVER IS GREATER ALONG THE SAME STREET WITHIN THE SAME POLITICAL SUBDIVISION.

SPECIAL INSTRUCTIONS FOR NO ONE CALL:

This format is good for NO ONE CALL.

NO ONE CALL tickets are when anyone observes excavation work and has reason to believe there is not a valid One Call notification.

A search of tickets in the last 90 days is done to confirm no existing, valid Serial Number was already created for the site before processing a NO ONE CALL.

The *Type of Work* value will display as "NO ONE CALL"

Both the "from" and the "to" *Lawful Start Dates* will transmit with spaces [] instead of the [DD-MON-YY] format. NO ONE CALL notifications transmit at an Emergency priority with the Scheduled Excavation Date and Dig Time as the current date and time.

Field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* data is collected from the caller, the output will only display the brackets:

Location Information--
[]

The following labels are values are always suppressed on No One Call tickets:

- | | |
|---|---|
| ▪ <i>Second Intersection</i> | ▪ <i>Work For</i> |
| ▪ <i>At Intersection</i> | ▪ <i>Called for Contractor</i> |
| ▪ <i>Between Intersection</i> | ▪ <i>Onsite Contact</i> |

SPECIAL INSTRUCTIONS FOR CROSS BORE:

This format is good for potential CROSS BORE tickets.

Potential CROSS BORE tickets are called in by Plumbers / Sewer Operators to avoid potential utility damage when clearing clogged sewer drains.

The *Type of Work* value will display as "POTENTIAL CROSS BORE"

Field values remain in the same place and blanks within the fields will not be transmitted. For example, if no *Location Information* is collected from the caller, the output will only display the brackets:

Location Information--

[]

Both the "from" and the "to" *Lawful Start Dates* will transmit with spaces [] instead of the [DD-MON-YY] format. Potential CROSS BORE notifications transmit at an Emergency priority.

The following labels are values are always suppressed on No One Call tickets:

- *Site Marked in White*
- *Duration*
- *Called for Contractor*
- *Complex Project Number*
- *PennDOT Contract/Permit Number*
- *CPA Project ID*
- *CPA Phase ID*
- *CPA Location ID*

The following labels and values will be suppressed when empty:

Overview

Pennsylvania One Call System, Inc. takes underground utility line protection requests and transmits those dig notifications to Facility Owner members. Facility Owner members receive or view their dig notifications to begin their internal processing. The Facility Owner is also required to respond back to the Pennsylvania One Call System to notify the original requestor of their involvement status, in addition to field marking, providing maps or plans, or attending a complex project meeting.

This document describes the design of the XML email attachment delivery option in Pennsylvania One Call's Phoenix Notification System. The primary motivation for this feature is to allow Facility Owner members to easily interpret dig notification deliveries without the restrictive rules of a parser. A dig notification is also referred to as a ticket.

Description

Pennsylvania One Call's Phoenix Notification System will provide the option for Facility Owner members to receive email tickets with an attached XML file. An HTML formatted copy of the ticket will also be in the body of the email. The HTML format includes a link to post a response through the Pennsylvania One Call System, Inc. website, which requires a log in and access to the online response application. The Attachments link inside the body of the ticket output will also be a link to go to the Pennsylvania One Call System, Inc.'s website, with a log in and credentials required, to view the map graphic, and any attached document to the ticket.

The list of fields on the ticket transmissions is found in the current Ticket Format Change Document that is available on the www.pa1call.org website.

Notable Changes

June 2024 – release adds the <HasDocument> tag to all tickets. Documents are attachments to tickets that the submitter adds when the ticket is created. These are available through logging into the www.pa1call.org website or following the link provided in the <Attachments> tag. The field will provide a True or False depending if the ticket has documents.

Example Ticket with attached XML

The attached file will be named TKT-<SerialNumber>-<Version>.xml.

The following tickets samples contain test data.

Excavation Routine Ticket Sample
